Fix-Loc™ wrist and thumb immobilization

Product description
Designed to immobilize thumb and wrist following severe sprain, arthritis, arthrosis and following a health care provider’s advice. It may also be used to help recovery from thumb tenosynovitis (De Quervain’s syndrome)

Characteristics
• Three removable stays prevent wrist and thumb movement
• Does not limit fingers movement
• Neoprene covered with brushed nylon and terry cloth interior
• Fix-Loc™ closure system: one single tab to pull
• Firm support
• Easy adjustment
• Velcro®-type closure around the thumb
• Colour: black

Made of: neoprene covered with brushed nylon and terry cloth interior lining.

Indications
- Sprain
- Strain
- Chronic instability
- De Quervain’s syndrome

To determine proper size, measure the circumference of the wrist. If the result is between two sizes, choose the largest.

Adjustment
Put on the support and pull on the Fix-Loc™ closure straps at once by using the Velcro® tab (step 1). Use the Velcro® strap to stabilize the thumb (step 2).

Cleaning
Wash by hand with mild soap and air-dry.

Caution: If pain should persist, or if you wish to know more about how to use this product, consult a health specialist.
